- c. "A first-rate research atlas, very useful for identifying (1) administrative units, which have been modified frequently, and (2) key places, in both Chinese character and romanization. An outstanding compilation and printing job; Plate 3 is a cartographic gem from standpoint of layout, color and printing".

- d. "I wish to thank you for presenting us a copy of this long-needed work. It will be of inestimable aid to those of our faculty and research community specializing in contemporary mainland China to whom knowledge of the extremely complicated and ever-changing administrative framework of the People's Republic of China is necessary or desirable. Of particular interest and usefulness is the gazette, by province, of all administrative units above the HSIEN level.

Thank you once again for your thoughtfulness in presenting us with a copy of this publication."
